

PEPTIDE THERAPY PROTOCOLS

Peptide Therapy-

Peptides are strings of amino acids that act as the building blocks for essential proteins in your body. Peptide therapy is a new, cutting-edge treatment as a potential adjunct to enhancing our body's ability to heal itself, as well as maintain an optimal health state. ReNU MD has developed peptide protocols that contains multiple individual peptides that have been selected based on science and research to best achieve the desired benefit

Our peptides are compounded in an FDA-approved pharmacy utilizing the purest ingredients and sterile procedures. Our peptide protocols are well-tolerated and safe. Not all peptides are FDA approved and many are prescribed for offlabel use at the discretion of the prescribing provider. They are sold as a 1-month treatment plan. Each protocol is administered as a subcutaneous (SQ) injection done in the comfort of your home. Patients will notice significant increase changes after the first month, to get the maximum benefits usually requires 3 months of therapy.

HOW DO I GET STARTED

Need more information? --> **Schedule a Free Virtual/Telehealth Consult to learn more**

<https://renumdhealth.myaestheticrecord.com/book/appointments>

Ready to get started with your Peptide Therapy?

All peptide therapy purchases require a 15-minute PEPTIDE consultation and on-boarding with our practice (\$100 booking fee, will be applied to the peptide protocol.)

<https://renumdhealth.myaestheticrecord.com/book/appointments>

Once this is complete, we mail/deliver the Peptide protocol directly to you (Must be refrigerated). Our peptides are compounded at fully accredited FDA-approved and licensed US pharmacy and we can only ship within the US. Not all peptides are FDA approved and many are prescribed for off-label use at the discretion of the prescribing provider. ***Consult your doctor if you are taking any blood-thinners prior to starting any subcutaneous (SQ) injections due to the risk of bleeding. Not for use if you are pregnant or breast feeding***
